- PCI Compliant Certified Hosting
 - Payment Card Industry (PCI) compliant security standards designed to ensure that ALL companies accepting credit card information maintain a secure environment.
- Free SSL
 - Security technology for establishing an encrypted link between a web server and a browser. This link ensures that all data passed remains private and integral. Enhanced ssl available, contact us for pricing.
- 7x7x7 Backups
 - Entire website, including all files and databases, back up 7 times a day, 7 days a week, stored for 7 months. We will be able to restore your website at any time!
- Expert DNS Support
 - Our support team members are experts in the industry, not only web professional but trained IT support professionals that can offer qualified assistance in all of your DNS needs.

- cPanel Access
 - Access to hosting control panel that will provide the ability to manage your own account in an easy to use web based interface. One click content management system installs such as WordPress and Joomla, File Transfer access, MySQL, PHP My Admin, and more.
- Individual IP address available at \$3/month
 - Your website will be granted a unique, individual IP address, separating your hosting on its own environment. Sometimes required for particular third-party applications/scripts.

Security Monitoring & Malware Removal | \$60/month

Includes everything from Basic

100 GB SSD Disk Space Storage

- Security Monitoring
 - Each single-tenant Private Cloud solution includes a firewall, load balancer, and a dedicated vCenter for your VMs to isolate your infrastructure and safeguard your data.
- Malware Detection and Removal
 - Deep automated scans detect malware, virus and malicious code that may be on your site. Once detected, our team will clean and restore the site to the pre-infected status.
- Powerful firewall
 - Blocking suspicious IPs and malware bots, prevented access to your hosted content.
- Automatic Updates
 - Our team will ensure your website is kept up-to-date including running on the latest servers available, CMS core updates, and themes, plugins, & add ons are updated as new ones are released.
- SLA uptime guarantee
 - Service Level Agreement: If we do not deliver our guaranteed uptime level, you will be entitled to refunds or hosting credits.
- Backup Restoration
 - If your site is ever hacked, and automatic update does not function properly, or you ever need a backup restored on your hosting, just let us

know! Our team will handle that easily.

- Website Activity Monitoring
 - Constant monitoring from our software alerts our team if your website is ever down, attacked, or problems are detected, and we will jump right on the issue.
- Monthly Activity Reporting
 - Monthly reports provided, outlining all activity on your hosting account, so you can keep informed easily on every detail.

Individual Virtual Private Server | \$200/month

Includes everything from Basic + Security Monitoring & Malware Removal

100 GB SSD Disk Space

- Individual IP address included
 - Your website will be granted a unique, individual IP address, separating your hosting on its own environment. Sometimes required for particular third-party applications/scripts.
- Dedicated Server Resources
 - Receive your own privately dedicated server resources including CPU Usage, Memory Consumption, I/O, Network, Disk Usage, and more.
- Cloud SSD
 - A SSD Cloud hosting is many times faster than regular HDD Cloud hosting. A SSD Cloud hosting means hosting of a website on many servers, which combine into one server, with SSD drives.
- Virtual IP
 - A virtual IP address (VIP or VIPA) is an IP address that doesn't correspond to an actual physical network interface. Uses for VIPs include network address translation (especially, one-to-many NAT), fault-tolerance, and mobility.
- Extensive Storage and Processing Abilities
 - 4 GB RAM, 4 vCPU, and 10 TB Bandwidth
- Built to your preferences
 - -Linux or Windows
 - -cPanel or Plesk Onyx

- CloudFlare CDN™
 - You'll receive the full management of one of the most popular CDNs in the world - at no extra charge - to speed up your site and further boost security. We'll set up and manage CloudFlare; you sit back and relax.
- Enhanced Security
 - Security is paramount, which is why we include ServerSecure™ with every server. Your server will be protected by a mighty suite of proprietary security enhancements that help block unwanted access and ensure your data remains secure.
- Built-in Backups
 - Local site backups are included with every server. For an extra layer of backup protection you can add Cloud backups, which enable automatic, full-server snapshots to provide unmatched data protection and recovery for your server.
- DDoS Attack Protection
 - We provide free basic protection from small volumetric DDoS attacks with every single server. Best of all, it's always on and ready to go. Comprehensive protections and mitigation are available for larger and more sophisticated attacks.

Dedicated Webmaster Add-On | \$50/month

Add to any hosting package above, or available even if your site is not hosted with us!

- Local Support
 - In addition to our online support portal, you will have a dedicated webmaster located at our office in Summerville, SC. Call-in or visit us in person to receive 1-on-1 support for your website needs.
- Unlimited site updates
 - Your dedicated webmaster will be able to edit your website whenever you need content changed, updated, removed or added to your site. Graphic design and web development services available.

Malware Cleaning | \$300 one-time charge

Is your hosting not with ADVYON and your website has been hacked? If you're receiving pop up advertisements, redirects, or any hacked issues on your website, let our experts restore your site to its original status for a one-time fee.

100% Satisfaction Guarantee
